CORDLESS HAMMER DRILL

18V Li-ion

INSTRUCTION MANUAL

SPECIFICATIONS

Input: 18V
Chuck Size: 13mm Keyless
No Load Speed: 0-350 / 0-1,200 /min
Impacts: 0-5,600 / 0-17,000bpm
Torque Setting: 19
Max. Torque: 30Nm
Drilling Capacity:
- Timber 25mm
- Steel 10mm
- Masonry 10mm
Battery: 1.3Ah Lithium Ion
Charge time: 3 - 5 Hours
Weight with Battery: 1.65kg

WHAT'S IN THE BOX

Hammer Drill
2 x 18V Battery
Drill Bits x 9
50mm Screwdriver Bit
Charging Adaptor
Charging Cradle

12. 50mm Screwdriver Bit
13. Steel Drill Bits x 3
14. Masonry Drill Bits x 3
15. Wood Drill Bits x 3

SETUP & PREPARATION

1. BATTERY

This charger is recommended for use with a residual current device with a rated residual current of 30mA or less.

Charging
1. Plug charging jack into charging cradle. Both lights will illuminate when connected.
2. Slide cradle onto the battery. Only the red light will be illuminated when properly connected and charging.

Note: Once fully charged, both the red and green lights will illuminate.

Installing and Removing
Slide the battery into the drill base until it clicks into place.

Hold down the battery release buttons and slide the battery out.

Battery Indicator
1. Depress the battery indicator button.
2. Observe which lights illuminate for a reading on your battery’s charge.

Charged
Low Charge
Flat
**2. CHUCK**

**Keyless Chuck**

Caution: Do not handle drill bits or other accessories without gloves as they are sharp and can become hot after use, potentially causing personal injury.

1. Open the chuck jaws.

2. Insert the drill bit, making sure it is centred in the jaws.

3. Tighten the chuck jaws.

4. Pull on the bit to ensure it is firmly secured.

**3. CONTROLS**

**Forward/Reverse Lever**

1. To set the drill to forward rotation, move fwd/rev lever to the right. For reverse rotation, move fwd/rev lever to the left.

2. To stop drilling release the trigger.

3. For faster speeds, squeeze the trigger firmly. For slower speeds, apply less pressure to the trigger.

**Variable Speed Trigger**

1. To start drilling squeeze the variable speed trigger.

2. To stop drilling release the trigger.

3. For faster speeds, squeeze the trigger firmly. For slower speeds, apply less pressure to the trigger.

**Speed Control**

The gear selector controls the speed of the drill. First gear allows slower drilling with more torque, while second gear is suitable when less power but more speed is required.

1. Slide the switch backward to select first gear.

2. Slide the switch forward to select second gear.

Caution: Do not handle drill bits or other accessories without gloves as they are sharp and can become hot after use, potentially causing personal injury.
### 3. FUNCTIONS

#### Drilling

1. To drill into wood, metal or plastic, turn the torque collar to align the arrow on the housing with the drill icon.

#### Hammer Drilling

Hammer drilling is required when drilling into concrete, brick or masonry

1. To select, turn the torque collar to align the arrow on the housing with the hammer icon.

#### Screwdriving to Preset Depth

Turn torque ring to the desired setting.

To determine the appropriate setting:

1. Set the torque collar to the lowest setting and tighten the first screw.
2. If the clutch rachets and makes a clicking sound before screw is flush, increase the collar setting and continue tightening.
3. Repeat until you reach the correct setting/ screw depth. Use this setting for the remaining screws.

### 4. DRILLING

Before starting to drill, perform a few simple checks.

1. Depress and release the variable speed trigger to ensure it is not locked on.  

2. Check the forward/reverse lever for the correct setting.

3. Secure the material to be drilled in a vice or clamp to stop it turning whilst drilling.

4. Hold the drill firmly and place the bit at the point to be drilled.

5. Depress the variable speed trigger to start the drill.

6. Move the drill bit into the workpiece.

**Note:** Do not force the drill or apply side pressure to elongate the hole. Let the drill do the work.
MAINTENANCE

1. When not in use, the hammer drill should be stored in a dry, frost free location, keep out of children’s reach.
2. Keep ventilation slots of the hammer drill clean at all times and prevent anything from entering.
3. If the housing of the hammer drill requires cleaning, do not use solvents. Use of a cloth only is recommended.
4. Blow out the ventilation slots with compressed air periodically.

Note: Ozito Industries will not be responsible for any damage or injuries caused by repair of the drill by an unauthorised person or by mishandling.

SPARE PARTS

18V Li-ion Battery Pack SPLCD6000-16
Charging Adaptor SPLCD5000-17
Charging Stand SPLCD5000-18

Spare parts can be ordered from the Special Orders Desk at your local Bunnings Warehouse.

TROUBLESHOOTING

LED lights do not illuminate on charger
Check the charging adaptor is securely plugged into the wall outlet. Check the battery is firmly connected to the charging cradle. Check that the charging jack is securely connected to the charging cradle.

The battery has a short run time
Ensure the battery is properly charged. It will take 4-5 charging cycles before the battery reaches optimum charge and run time. On the initial charge, the battery requires 5 hours of charging. Subsequent charging only requires 3-5 hours.

Variable speed trigger is locked
Ensure that the forward / reverse lever is in the correct position; pressed left for forwards direction, pressed right for backwards direction. If it is in between the two settings the variable speed trigger will be locked.

The drill is stripping the screw head
Ensure you are not applying too much force to the screw. Hold the drill more lightly against the screw and lower the torque setting.

Drill has cut out during use
Use the battery indicator button to check if the battery has gone flat. If the indicator does not work or indicates that the battery still has charge, it is likely that the battery’s thermal voltage protection has been activated. This can happen when the drill has been used for extended periods or worked hard with large drill bits or accessories.

Place the battery on the charging cradle for 3-5 hours. It will need this time to cool down and for the protection circuits to be reset.

Sparking visible through the housing air vents
A small amount of sparking may be visible through the housing vents. This is normal and does not indicate a problem.

CARING FOR THE ENVIRONMENT

Power tools that are no longer usable should not be disposed of with household waste but in an environmentally friendly way. Please recycle where facilities exist. Check with your local council authority for recycling advice.

Recycling packaging reduces the need for landfill and raw materials. Reuse of recycled material decreases pollution in the environment. Please recycle packaging where facilities exist. Check with your local council authority for recycling advice.

HAMMER DRILL SAFETY WARNINGS

WARNING! Wear ear protectors when impact drilling
Exposure to noise can cause hearing loss. Use auxiliary handle(s), if supplied with the tool. Loss of control can cause personal injury.

Hold power tool bi insulated gripping surfaces, when performing an operation where the cutting accessory may contact hidden wiring or its own cord. Cutting accessory contacting a “live” wire may make exposed metal parts of the power tool “live” and could give the operator an electric shock.

Before drilling into walls, ceilings etc. ensure that there are no concealed power cables or pipes in the cavity.

“Live” and could give the operator an electric shock.

Before drilling into walls, ceilings etc. ensure that there are no concealed power cables or pipes in the cavity.

WARNING! Some dust created by power sanding, sawing, grinding, drilling and other construction activities contain chemicals known to cause cancer, birth defects or other reproductive harm.

Some examples of these chemicals are:
• Lead from lead-based paints
• Crystalline silica from bricks and cement and other masonry products
• Arsenic and chromium from chemically treated timber

Your risk from exposure to these chemicals varies, depending on how often you do this type of work. To reduce your exposure to these chemicals: work in a well ventilated area and work with approved safety equipment, such as dust masks that are specially designed to filter out microscopic particles.
The following is a list of spare parts carried by Ozito. Please contact Customer Service for any parts not listed.

ELECTRICAL SAFETY

WARNING! When using mains-powered tools, basic safety precautions, including the following, should always be followed to reduce risk of fire, electric shock, personal injury and material damage. Read the whole manual carefully and make sure you know how to switch the tool off in an emergency, before operating the tool.

Save these instructions and other documents supplied with this tool for future reference. The electric motor has been designed for 230V and 240V only. Always check that the power supply corresponds to the voltage on the rating plate. Note: The supply of 230V and 240V on Ozo tools are interchangeable for Australia and New Zealand.

This tool is double insulated in accordance with AS/NZS 60335-1; therefore no earth wire is required.

GENERAL POWER TOOL SAFETY WARNINGS

WARNING! Read all safety warnings and all instructions. Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury.

Save all warnings and instructions for future reference. The term “power tool” in the warning refers to your mains-operated (corded) power tool or battery-operated (cordless) power tool.

1. Work area safety

a. Keep work area clean and well lit. Cluttered or dark areas invite accidents.
b. Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite the dust or fumes.
c. Keep children and bystanders away while operating a power tool. Distractions can cause you to lose control.

2. Electrical safety

a. Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) power tools. Unmodified plugs and matching outlets will reduce risk of electric shock.
b. Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, and refrigerators. There is an increased risk of electric shock if your body is earthed or grounded.
c. If operating a power tool in rain or wet conditions, use an extension lead suitable for outdoor use. Water entering a power tool will increase the risk of electric shock.
d. Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts. Damaged or entangled cords increase the risk of electric shock.

When operating a power tool outdoors, use an extension cord suitable for outdoor use. Use of a cord suitable for outdoor use reduces the risk of electric shock.

f. If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply. Use of an RCD reduces the risk of electric shock.

g. Before using the charger read all instructions and cautionary markings on the charger, battery pack and the product using the battery pack.

h. This charger is not intended for any uses other than charging rechargeable batteries. Any other use is likely to bind and are easier to control.

h. Use power tools only with specifically designated battery packs. Use of any other battery packs may create a risk of injury and fire.

2. Personal safety

a. Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication.

b. Use personal protective equipment. Always wear eye protection. Use of dust collection can reduce dust-related hazards. Use the power tool, accessories and tool bits etc. in accordance with these instructions, taking into account the working conditions and the work to be performed. Use of the power tool for operations different from those intended could result in a hazardous situation.

3. Battery tool use and care

a. Recharge only with the charger specified by the manufacturer. A charger that is suitable for one type of battery pack may create a risk of fire when used with another battery pack.

b. Use power tools only with specifically designated battery packs. Use of any other battery packs may create a risk of injury and fire.

c. When battery pack is not in use, keep it away from other metal objects, like paper clips, coins, keys, nails, screws or other small metal objects, that can make a connection from one terminal to another. Contact between terminals can cause shocks, fires or loss of tool functionality.

3. Personal safety

b. Do not overreach. Keep proper footing and balance at all times. This enables better control of the power tool in unexpected situations.

c. Dress properly. Do not wear loose clothing or jewellery. Keep your hair, clothing and gloves away from moving parts.

5. Make sure the cord is located so that it will not be stepped on, tripped over, or otherwise subjected to damage or stress.

6. To reduce risk of damage to the electric plug and cord, pull by the plug rather than the cord when unplugging the power tool.

7. To prevent accidental start-up, always switch the tool off before connecting the power tool.

8. If the supply cord is damaged, it must be replaced by an electrician or a power tool repairer in order to avoid a hazard.

9. If the supply cord is damaged, it must be replaced by an electrician or a power tool repairer in order to avoid a hazard.

10. Do not incinerate the battery pack even if it is seriously damaged or is completely worn out. The battery can explode in a fire.

11. Never attempt to open the battery pack for any reason. If the plastic housing of the battery pack breaks or cracks, immediately discontinue use and do not recharge.

12. During charging, the battery must be placed in a well ventilated area.

BATTERY AND CHARGER SAFETY WARNINGS

THIS MANUAL CONTAINS IMPORTANT SAFETY AND OPERATING INSTRUCTIONS FOR YOUR BATTERY CHARGER.

1. Before using the charger read all instructions and cautionary markings on the charger, battery pack and the product using the battery pack.

2. This charger is not intended for any uses other than charging rechargeable batteries. Any other use is likely to bind and are easier to control.

3. Do not use the charger while you are tired or under the influence of drugs, alcohol or medication.

4. Use personal protective equipment. Always wear eye protection. Use of dust collection can reduce dust-related hazards. Use the power tool, accessories and tool bits etc. in accordance with these instructions, taking into account the working conditions and the work to be performed. Use of the power tool for operations different from those intended could result in a hazardous situation.

5. Battery tool use and care

a. Have your power tool serviced by a qualified repair person using only identical replacement parts. This will ensure that the safety of the power tool is maintained.

b. If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

6. Service

a. Have your power tool serviced by a qualified repair person using only identical replacement parts. This will ensure that the safety of the power tool is maintained.

b. If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

7. Do not incinerate the battery pack even if it is seriously damaged or is completely worn out. The battery can explode in a fire.

8. Never attempt to open the battery pack for any reason. If the plastic housing of the battery pack breaks or cracks, immediately discontinue use and do not recharge.

9. During charging, the battery must be placed in a well ventilated area.

10. Do NOT store or use the tool and battery pack in locations where the temperature may reach or exceed 40ºC (such as inside sheds or metal buildings in summer).

11. The charger is designed to operate on standard household electrical power (240 volts). Do not attempt to use it on any other voltage!

12. The battery pack is not fully charged out of the carton. First read the safety instructions and then follow the charging notes and procedures.

13. The longest life and best performance can be obtained if the battery pack is charged when the air temperature is between 18 - 24°C. Do not charge the battery pack in an air temperature below 10ºC or above 40ºC. This is important and will prevent damage to the battery pack.
IN ORDER TO MAKE A CLAIM UNDER THIS WARRANTY YOU MUST RETURN THE PRODUCT TO YOUR NEAREST BUNNINGS WAREHOUSE WITH YOUR BUNNINGS REGISTER RECEIPT. PRIOR TO RETURNING YOUR PRODUCT FOR WARRANTY PLEASE TELEPHONE OUR CUSTOMER SERVICE HELPLINE:

Australia 1800 069 486
New Zealand 0508 069 486

TO ENSURE A SPEEDY RESPONSE PLEASE HAVE THE MODEL NUMBER AND DATE OF PURCHASE AVAILABLE. A CUSTOMER SERVICE REPRESENTATIVE WILL TAKE YOUR CALL AND ANSWER ANY QUESTIONS YOU MAY HAVE RELATING TO THE WARRANTY POLICY OR PROCEDURE.

The benefits provided under this warranty are in addition to other rights and remedies which are available to you at law. Our goods come with guarantees that cannot be excluded at law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Generally you will be responsible for all costs associated with a claim under this warranty, however, where you have suffered any additional direct loss as a result of a defective product you may be able to claim such expenses by contacting our customer service helpline above.

3 YEAR REPLACEMENT WARRANTY

Your product is guaranteed for a period of 36 months from the original date of purchase and is intended for DIY (Do It Yourself) use only. If a product is defective it will be replaced in accordance with the terms of this warranty. Warranty excludes consumable parts, for example: included accessories, etc.

WARNING

The following actions will result in the warranty being void.

• If the tool has been operated on a supply voltage other than that specified on the tool.
• If the tool shows signs of damage or defects caused by or resulting from abuse, accidents or alterations.
• Failure to perform maintenance as set out within the instruction manual.
• If the tool is disassembled or tampered with in any way.
• Professional, industrial or high frequency use.
