WET & DRY VACUUM

1250W 20L
INSTRUCTION MANUAL

SPECIFICATIONS

Mains Voltage: 220 – 240V ~ 50Hz
Input Power: 1250W
Suction Power Max.: 180 mbar
Air Flow: 68 l/s
Tank Capacity: 20 l
IP Rating: IP24
Product weight: 4.7 kg

WHAT’S IN THE BOX

Adapter
Crevice Tool
Floor Tool
Castors x 4
Suction Hose Ø36mm x 1.5m
Extension Tubes x 3
Filter Bag
Dust Bag
Foam Filter

3 YEAR REPLACEMENT WARRANTY

VWD-1220
**WET & DRY VACUUM**

1. Handle
2. Motor
3. Suction Hose
4. Extension Tubes
5. Filter Basket
6. Safety Float
7. On/Off Switch
8. Motor Securing Clips
9. Vacuum Inlet
10. Tank
11. Adapter
12. Blow Outlet
13. Castors
14. Floor Tool

**ACCESSORIES**

15. Filter Bag
16. Dust Bag
17. Foam Filter
18. Crevice Tool
19. Cable Hook

**1. ASSEMBLY**

**Assembling the Castors**

1. Turn the container upside down.

2. Insert the castor assemblies into the base of the tank.

**Fitting the Motor**

1. When fitting the motor to the tank, position it so that the motor securing clips on the tank align with the fastening points on the motor.

2. Fasten the motor securing clips to the motor, making sure that they lock into place correctly.

3. To remove the motor, open the motor securing clip and lift the motor out of the tank.

**Fitting the Handle**

1. Align the holes on either side of the handle with the holes in the top side of the motor.

2. Insert two screws (supplied) into the handle and tighten with a screwdriver (not supplied).
Mounting the Cable Hook

1. Press the cable hook for the cable store into the mount on the base of the unit.

2. After use, the power cable can be conveniently wound onto the cable hooks.

Fitting the Dust Bag

1. For vacuuming fine, dry dirt it is recommended that you fit the dust bag. The dust bag is suitable for dry vacuuming only. Using the dust bag makes it easier to dispose of the dust that has been collected.

2. To attach, slip the dust bag over the vacuum inlet.

Fitting the Foam Filter - Vacuuming Liquid

For wet vacuuming, slip the supplied foam filter over the filter basket.

**NOTE:** Do not use the filter bag and/or dust bag when vacuuming liquid.

Fitting the Filter Bag - Vacuuming Dry Matter

For dry vacuum cleaning always use the filter bag. Mount the filter bag, so that no air is sucked through the filter cage without being filtered.

**NOTE:** Do not use the foam filter when vacuuming dry matter.

**IMPORTANT!** NEVER USE THE WET AND DRY VACUUM CLEANER WITHOUT A FILTER! ALWAYS ENSURE THAT THE FILTERS ARE PERFECTLY SECURE!
3. FITTING HOSES & NOZZLES

Connect the suction hose to the corresponding connector on the wet and dry vacuum, depending on the application required:

**Vacuuming**
Connect the suction hose to the vacuum inlet.

**Blowing**
Connect the suction hose to the blow outlet.

**Extension Tube and Adaptor**
1. The suction hose can be extended by attaching one or more sections of the 3 part extension tubes.

2. The adapter must be inserted between the extension tube and whichever of the nozzles is required.

**Suction Tools**

**Floor Tool**
The floor tool is for vacuuming solids and liquids over medium to large areas.

**Crevice Tool**
The crevice tool is designed for cleaning crevices and edges.

4. OPERATION

This vacuum must be used with a residual current device with a rated residual current of 30mA or less.

**On/Off Switch**
Switch position 0: OFF
Switch position I: ON

**Dry Vacuuming**
Use the dust bag and the filter bag for dry vacuuming (see 2. Fitting the Filter).
Check that the filter is securely fitted at all times.

**Wet Vacuuming**
For wet-vacuuming, use the foam filter (see 2. Fitting the Filter).
Check that the filter is securely fitted at all times.

**Blowing**
Connect the suction hose to the blow outlet on the wet and dry vacuum cleaner.

**NOTE:** The tank will collect 12 Litre max of fluid and the float switch will turn off the vac.

**IMPORTANT!** WHEN WET VACUUMING, THE SAFETY FLOAT TURNS OFF THE WET AND DRY VACUUM CLEANER AUTOMATICALLY WHEN THE MAXIMUM LEVEL IS REACHED.

**IMPORTANT!** THE WET AND DRY VACUUM CLEANER IS NOT SUITABLE FOR THE VACUUMING OF COMBUSTIBLE LIQUIDS.
5. CLEANING & STORING

Cleaning
Keep all safety devices, air vents and the motor housing free of dirt and dust as far as possible. We recommend that you clean the equipment immediately after you use it.

Cleaning the motor housing
Clean the appliance regularly with a damp cloth and some soft soap. Do not use cleaning agents or solvents; these may be aggressive to the plastic parts in the appliance.

Cleaning the tank
The tank can be cleaned with a damp cloth and some soft soap or under running water, depending on the amount of dirt.

Cleaning the foam filter
Clean the foam filter with a little soft soap under running water and allow it to air-dry.

Storing
Ensure the Wet & Dry Vac has been fully emptied of any dry matter or liquid before it is stored.

Wrap the power cable around the cable hooks.

Keep all the accessories with the unit to avoid losing them.

Keep in a dry place out of reach of children.

CARING FOR THE ENVIRONMENT

Power tools that are no longer usable should not be disposed of with household waste but in an environmentally friendly way. Please recycle where facilities exist. Check with your local council authority for recycling advice.

Recycling packaging reduces the need for landfill and raw materials. Reuse of recycled material decreases pollution in the environment. Please recycle packaging where facilities exist. Check with your local council authority for recycling advice.

**ELECTRICAL SAFETY**

**WARNING!** When using mains-powered tools, basic safety precautions, including the following, should always be followed to reduce risk of fire, electric shock, personal injury and material damage. Read the whole manual carefully and make sure you know how to switch the tool off in an emergency, before operating the tool. Save these instructions and other documents supplied with this tool for future reference. The electric motor has been designed for 230V and 240V only. Always check that the power supply corresponds to the voltage on the rating plate.  

**Note:** The supply of 230V and 240V on Ozito tools are interchangeable for Australia and New Zealand.  

**Note:** The power outlet used for the vacuum must be protected by a 30mA residual current device or earth leakage circuit breaker.  

**This tool is double insulated in accordance with AS/NZS 60335-1; therefore no earth wire is required.**

---

**GENERAL POWER TOOL SAFETY WARNINGS**

**WARNING!** Read all safety warnings and all instructions. Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury. Save all warnings and instructions for future reference. The term “power tool” in the warnings refers to your mains-operated (corded) power tool or battery-operated (cordless) power tool.  

**1. Work area safety**

a. Keep work area clean and well lit. Cluttered or dark areas invite accidents.

b. Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite the dust or fumes.

c. Keep children and bystanders away while operating a power tool. Distractions can cause you to lose control.

**2. Electrical safety**

a. Power tool plugs must match the outlet. Never modify the plug in any way.

b. Do not use adapter plugs with earthed (grounded) power tools. Unmodified plugs and matching outlets will reduce risk of electric shock.

c. Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, ranges and refrigerators. There is an increased risk of electric shock if your body is earthed or grounded.

d. Do not expose power tools to rain or wet conditions. Water entering a power tool will increase the risk of electric shock.

e. Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. When lifting the unit, always lift it with the handle or under trim of bucket. Beware of excess cord that is rubbing against hot surfaces or the floor.

e. Do not approach the unit with the cord leading from it.

e. Keep cutting tools sharp and clean. Many accidents are caused by poorly maintained power tools.

e. Use of an RCD protects power tools in the case of misuse. The user/operator and not the manufacturer will be liable for any damage or injuries of any kind caused as a result of this.

**3. Personal safety**

a. Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication.

b. Use personal protective equipment. Always wear eye protection. Protective equipment such as dust mask, non-skid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injuries.

---

**WET & DRY VACUUM TOOL SAFETY WARNINGS**

**IMPORTANT!** When using the equipment, a few safety precautions must be observed to avoid injuries and damage. Please read the complete operating manual with due care. Keep this manual in a safe place so that the information is available at all times. If you give the equipment to any other person, give them these operating instructions as well. We cannot accept any liability for damage or accidents which arise due to a failure to follow these instructions and the safety information.

- Do not leave appliance unattended when plugged in. Unplug from outlet when not in use and before servicing and cleaning.
- To avoid electric shock, do not expose to rain. Store indoors.
- Never use in the presence of explosive liquids, vapours or explosive dust – such as coal or grain.
- Never pick up asbestos or asbestos dust.
- Wood dust and chips in a confined area can give rise to fire or explosion. Guard against possible ignition sources.
- Do not pick up anything that is burning or smouldering – such as metal grinding dust, cigarette ends, hot coals, matches or similar.
- The appliance is not intended for use by young children or infirm persons without supervision. Young children should be supervised to ensure they do not play with the appliance.
- Use only manufacturer’s recommended attachments and consumables.
- Never modify the cleaner in any way - this is dangerous and will invalidate the warranty.
- Do not use cleaner without the filter in place.

If the supply cord is damaged, it must be replaced by an electrician or a power tool repairer in order to avoid a hazard.

**Note:** Double insulation does not take the place of normal safety precautions when operating this tool. The insulation system is for added protection against injury resulting from a possible electrical insulation failure within the tool.

**Avoid an Extension Lead**

Always use an approved extension lead suitable for the power input of this tool. Before use, inspect the extension lead for signs of damage, wear and ageing. Replace the extension lead if damaged or defective.

When using an extension lead on a reel, always unwind the lead completely. Use of an extension lead not suitable for the power input of the tool or which is damaged or defective may result in a risk of fire and electric shock.
IN ORDER TO MAKE A CLAIM UNDER THIS WARRANTY YOU MUST RETURN THE PRODUCT TO YOUR NEAREST BUNNINGS WAREHOUSE WITH YOUR BUNNINGS REGISTER RECEIPT. PRIOR TO RETURNING YOUR PRODUCT FOR WARRANTY PLEASE TELEPHONE OUR CUSTOMER SERVICE HELPLINE:

Australia 1800 069 486
New Zealand 0508 069 486

TO ENSURE A SPEEDY RESPONSE PLEASE HAVE THE MODEL NUMBER AND DATE OF PURCHASE AVAILABLE. A CUSTOMER SERVICE REPRESENTATIVE WILL TAKE YOUR CALL AND ANSWER ANY QUESTIONS YOU MAY HAVE RELATING TO THE WARRANTY POLICY OR PROCEDURE.

3 YEAR REPLACEMENT WARRANTY

Your product is guaranteed for a period of 36 months from the original date of purchase. If a product is defective it will be replaced in accordance with the terms of this warranty.

WARRANTY

TO ENSURE A SPEEDY RESPONSE PLEASE HAVE THE MODEL NUMBER AND DATE OF PURCHASE AVAILABLE. A CUSTOMER SERVICE REPRESENTATIVE WILL TAKE YOUR CALL AND ANSWER ANY QUESTIONS YOU MAY HAVE RELATING TO THE WARRANTY POLICY OR PROCEDURE.

The benefits provided under this warranty are in addition to other rights and remedies which are available to you at law. Our goods come with guarantees that cannot be excluded at law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Generally you will be responsible for all costs associated with a claim under this warranty, however, where you have suffered any additional direct loss as a result of a defective product you may be able to claim such expenses by contacting our customer service helpline above.

WARNING

The following actions will result in the warranty being void.

- If the tool has been operated on a supply voltage other than that specified on the tool.
- If the tool shows signs of damage or defects caused by or resulting from abuse, accidents or alterations.
- Failure to perform maintenance as set out within the instruction manual.
- If the tool is disassembled or tampered with in any way.
- Professional, industrial or high frequency use.
